Mr. Charles Smith  
Morrow Environmental Engineering Services Ltd.  
Suite 500 – 2300 Kingsway Avenue  
Burnaby, BC V9E 2J6

Dear Mr. Smith,

Working in environmental assessments with a consulting engineering company is an opportunity that interests me a great deal. With a unique combination of science and engineering skills developed through academic and workplace experience, I am well suited to meet the challenges of a position with Morrow Environmental Engineering Services. Enclosed is my resume which highlights my related skills, experience and education.

I am currently completing my Masters of Science in Geological Science at UBC where my focus is in wave dynamics as well as environmental fluid dynamics, physical oceanography and limnology. Throughout my degree, I have been involved in a number of field-based projects including a recent assignment examining the impact of wave pressure on the Sea-to-Sky Highway project. My role involved gathering data and applying mathematical models to assess the wave pressure on the new highway structure. In recognition of my contribution, I was offered another short-term project on a part-time basis while continuing my studies. In addition, I possess a range of skills that could be applied to water-related projects including project design, data analysis, and report writing. I have received academic awards for strong academic performance and have been commended for by past employers for possessing leadership skills.

My goal is to join a company that takes an integrated approach to aquatic environmental projects. I thrive in fast-paced, "can-do" environments. I have learned that Morrow Engineering has a strong project oriented environment and also uses sustainability practices in all of their client projects. I share this commitment to improving our environment and have chosen a career path that will enable me to make a positive impact to the functioning of Canada's water systems. I would be very excited to join Morrow for this reason!

I am eager to learn more about how I can add to Morrow's success in offering its clients a wide range of oceanographic and limnological services. I would welcome an opportunity to discuss my qualifications more fully and will call you shortly to answer any immediate questions that you may have.

Sincerely,

Ken Lee
