

A woman with long brown hair is smiling and looking at a young child with short brown hair. They are in a library, with bookshelves filled with books in the background. The woman is holding the child's hand, and the child is pointing towards the camera.

UBC FACULTY OF

# EDUCATION

## RESEARCH STRENGTHS & FACILITIES

Our scholars link educational research to local and global community needs, inform theory, practice and policy, and introduce innovative research methods. Notable strengths are in literacy, struggling and marginalized youth, Indigenous education and research, transformational curriculum design, social-emotional well-being, autism, and multidisciplinary research in diversity, health and digital media.

We provide outstanding research facilities for faculty and graduate students that promote leading-edge research. Our **Education Library** is a specialized resource with access to all of UBC's research and special collections, including the **Xwi7x̱wa (Indigenous) Library** with materials produced by Indigenous organizations, tribal councils, schools, researchers and publishers.

Additional research infrastructure includes support for the development of faculty research funding proposals from experienced research grant facilitators and personnel with expertise in budget management, project management and information technology planning.

## UBC's Faculty of Education is a leader in educational research and practice

within BC, Canada and the world. Our internationally renowned scholars and talented graduate students collaborate with local and international community partners to generate new knowledge and to advance understanding, practice, and policy in education.
